# SIGN SUSPENSION SYSTEM

**ALEMTEK**

Alemtek, founded in 2000, is a multigenerational family company dedicated to providing innovative suspension systems through a unique partnership. Working with our team is a creative process that enables new ideas and offers you support in developing new solutions.

With over 25 years in the industry, partnering with us is simple, and our suspension solutions are easy-to-use, durable, and designed for minimal impact.

Note that the examples shown are only some parts of our full product range. Visit our website or contact us directly for more information and customization.

Our service is at your disposal.

## ALEMTEK

## Attachment

A fixed point attached to ceilings, walls, floors, or products by screws to enable wire suspension. Most often an attachment to the ceiling is used.

## Wire

A steel wire made for high performance together with a gripper. The wire ending is shaped to suit your installation and can be fastened to an attachment or your product.

## Gripper

Compact designed grippers allow swift installation and instant adjustment. Alemtek has many different models to choose from, depending on your area of use and weight capacities. Always match the gripper with the chosen wire diameter.

# How to use grippers

**A** Insert the wire through the gripper pin, unless specified otherwise.

**B** Slide the gripper upward to adjust its position. Once you release it, the gripper will automatically lock onto the wire.

**C** To unlock, press down the gripper pin. This allows the gripper to slide freely up and down the wire. To lock it in place again, simply release the gripper pin.

## Attachment

Choose attachment based on the type of ceiling and desired style.
